Professional summary

Credit risk and underwriting professional with 11+ years of experience across banking and fintech, spanning merchant and seller risk, credit appraisal, portfolio monitoring, credit ratings, stress testing and risk mitigation. Hands-on experience with SQL, workflow automation, data integration and UAT, alongside collaboration with Data Science teams. Building on this domain experience through practical data science, machine learning and GenAI projects for analytics and AI-enabled decisioning.

Core skills

Credit and risk: Enterprise underwriting; financial analysis and forecasting; portfolio and concentration risk; merchant risk; stress testing; PD modeling; credit scorecards and model validation; AML/KYC due diligence; risk mitigation.

Data and analytics: Python, SQL, Pandas, NumPy, Scikit-learn, PyMySQL, SQLAlchemy, Power BI and Advanced Excel.

Machine learning: Predictive modeling, feature engineering, XGBoost, Random Forest, Logistic Regression, K-Means, PCA and model evaluation.

GenAI and applications: RAG pipelines, FAISS, Hugging Face embeddings, Gemini, LangChain, prompt engineering, LLM evaluation, Streamlit, Git/GitHub and VS Code.

Professional experience

Senior Analyst - Credit Underwriting, Global Seller Risk Strategy

PayPal India Pvt. Ltd. | Bengaluru | Sep 2022 - Mar 2026

• Underwrote large enterprise EMEA/APAC merchants across onboarding and international expansion; assessed solvency, cash burn and Exposure at Default to support risk ratings and limits.

• Analyzed buyer claims, chargebacks, transaction patterns and merchant risk indicators; recommended reserves, collateral, transaction limits and account restrictions.

• Extracted and analyzed transaction datasets using SQL to support credit risk assessments and executive committee decisions.

• Investigated KYC/AML/CFT risks and supported merchant outreach automation as a domain business analyst across Tech, Product and Risk teams.

VISHAL S

Professional experience and qualifications

Manager - Risk Management Department

The Karur Vysya Bank Ltd. | Bengaluru | Nov 2021 - Aug 2022

• Sanctioned fund and non-fund credit proposals within delegated authority, maintaining policy compliance and turnaround standards.

• Led a divisional team managing credit sanction approvals across the Bengaluru Division.

• Validated internal credit rating models, retail scorecards and PD estimates; conducted portfolio stress testing for liquidity and leverage risks.

• Monitored MSME, corporate and retail portfolios for sector concentration risk and rating migration using Key Risk Indicators.

Assistant Manager - Credit Analyst, Risk Management Department

The Karur Vysya Bank Ltd. | Bengaluru | Apr 2016 - Nov 2021

• Evaluated borrower credit history, financials, repayment capacity and financial indicators including DSCR, ROA and ROI to support loan decisions.

• Developed credit risk reports to identify portfolio vulnerabilities and operational bottlenecks.

• Administered working-capital renewals, collateral insurance coverage and internal audit compliance.

Earlier banking roles

Karur Vysya Bank: Clerk (2014 - 2016) | ICICI Bank: Customer Service Officer (2013)

• Handled ledger reconciliation, credit report data entry, CERSAI registrations and SLA-driven customer dispute resolution.

Education

Master Data Science Program

HCL GUVI | Mar 2026 - Sep 2026 | Remote

B.E. Electronics and Communication Engineering

K.L.N.C.I.T., Sivagangai | 2006 - 2010

Certifications

IIBF: Certified Credit Professional; JAIIB; Risk in Financial Services; MSME Certification.

KYC/AML Certification - Manipal University.

VISHAL S

Selected automation and AI/ML projects

PayPal Customer Outreach Automation

Business analysis, UAT and data integration

• Identified manual merchant outreach inefficiencies and collaborated with cross-functional teams on dashboard-driven workflows for KYC, transaction, shipping and fraud reviews.

• Integrated and validated customer profile and transaction-history data to support automated due-diligence triggers.

• Led pilot UAT for triggers, checklists and data integrity, identifying defects and supporting rollout.

Health Insurance Policy Assistant

Generative AI and retrieval-augmented generation

• Built a RAG assistant using Gemini, LangChain, FAISS and Hugging Face embeddings for semantic retrieval from policy records.

• Implemented top-k retrieval and context grounding, and compared embedding approaches.

• Built an evaluation framework covering answer accuracy, contextual relevance, faithfulness, hallucination risk and response latency.

Employee Job Acceptance Prediction System

Predictive analytics and machine learning

• Built an end-to-end binary classification pipeline and benchmarked multiple algorithms to predict candidate offer acceptance.

• Deployed an XGBoost model and integrated MySQL, Streamlit and Power BI for interactive predictive hiring analytics.

App User Behavior Segmentation

Unsupervised machine learning

• Developed a K-Means segmentation pipeline with StandardScaler, feature engineering and behavioral analysis.

• Evaluated clustering with WCSS/elbow analysis, silhouette score, PCA and Adjusted Rand Index.

• Built a Streamlit dashboard for exploring high, moderate, low and occasional engagement groups.

Explore the complete portfolio

Additional projects include Driver Drowsiness Detection, Global Seismic Trends and Online Food Delivery Analysis.
